1. Applicant's arguments, see pages 7-9, filed 25 January 2006, with respect to claims 39-56 have been fully considered and are persuasive. The 102(b) rejections of claims 39-49, 46-53, 55, and 56 have been withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 39-46, 48-60, and 62-65 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolt 4204282.

4. Bolt teaches a sleeve comprising a generally cylindrical portion and an opening at one end, the sleeve further comprising resilient expandable biocompatible material (used within the body); the sleeve further comprising at least one suture aperture; the sleeve further comprising a reinforcement structure; wherein the reinforcement structure is positioned proximate the suture aperture; wherein the reinforcement structure comprises a band of material extending at least partially radially about the sleeve; wherein the band comprises a layer of resilient material having a higher tear strength than the resilient material of the sleeve (band is solid and the resilient material is a mesh, a solid would metal would have a higher tear strength than a mesh); wherein the band is

made integrally with the sleeve wall; wherein the band comprises a discrete component; wherein the band extends radially outwardly from a wall of the sleeve (see fig. 3); wherein the sleeve comprises a plurality of suture apertures spaced radially about the sleeve; further comprising a second opening.
